The starting and stopping is exasperating but I hope you will not drop the project. At the moment you have a good list that has to be organized-that's what I meant by "categories" weeks ago. Some injunctions have to do with competent and responsible work, "put forth best effort;" others have to do with customer, etc. A preamble about computer engineering and developing programs is needed to give an organized list some context. I hope these comments are of use.
