Hello, Steve.

Congratulations on your election to president of ACM.

As you may know, I am one of the ACM representatives to the software engineering coordinating committee, specifically the vice-chair of that committee. There are a number of issues that need to be discussed about this committee and related activities. For starters, a third member of the committee needs to be named, unless the committee is dissolved. (The position has remained unfilled for over 6 months due, I believe, to the previous administration's discomfort with this activity.)

I would like a chance to chat with you about this activity, fill you in on its history, etc. Also, there is a group of about a half dozen software engineering people who have had a lot of experience in this arena who would like to participate with you in a conference call or face to face meeting on this subject (Nancy Mead, SEI; Don Gotterbarn, head of the SW engineering code of ethics effort; Don Bagert, first licensed software engineer in the US; Tony Wasserman; and Larry Jones, SEI, prominent in CSAB software engineering and computer science activities).

Please let me know when and how we could communicate.
Regards, DJF
