Re: Copy of: Re: Soft. Engr. Articles

Jay,

I had to resend the message to Al - I had the wrong letter in the address. These machines are too exact - we need some fuzzy logic implemented. Maybe you can put it in your granuate courses on Distributed Systems but I am not sure we can do that yet - maybe it is 5-10 years down the road.

I think you should pick the third person since you know them. I don't think we should ask a number of people at once, one at a time. If you prioritize the list you have I could contact one at a time outlineing what we are proposing; if one says yes we will be set.

Ed
