Subject: Code Of Ethics & ICCP

First, the Mutual Recognition Agreement with ICCP is a great idea: congratulations.
Second, you are probably already aware of the joint effort of IEEE CS and ACM to make Software Engineering a profession. One part is a Code of Ethics. It can be reviewed and commented upon on the below web page. If you can, would you pass this page on to your members.
Ed Mechler, CCP

RE>Letter to Editor 7/9/97

Dear Mr. Mechler:

Thanks for the correspondence.

In reference to your first e-mail, you might want to send a message to "accreditation@ieee.org" and inquire if they do in fact need evaluators in the field of software engineering. If you don't get a quick response, you can contact Carolyn Solimine at 1-908-562-5484 or e-mail "c.solimine@ieee.org".

When I have a chance, I will look at the Web sites you listed and pass along any comments.

Regards,
Greg Gillespie
Editor, THE INSTITUTE

To the Editor

The IEEE CS and ACM formed a steering committee to make Software Engineering a profession. The first web address below describes the work to date. The second web page has the proposed Code of Ethics. Can you review the code and pass on any comments to the e-mail listed? Also pass the web sites on to other software people, internal or external.

Subject: IEEE/ABET Accreditation of SE

Greg Gillespie Editor

While reading your article on IEEE/ABET accreditation of SE in the July, 97 issue a number of questions developed.

What is the relationship of this activity to the Joint Steering(IEEE and ACM) to make SE a Profession? Since so much work has been done in this project it seems reasonable to have a connection.

Also in the same issue you ask for evaluators, is it possible to

become an evaluator for this category? I would like to participate in this area.

Thanks

Ed

Ed,

I went to www.computer.org/tab/seprof without a problem but when I added the code.htm I get the message "The requested item could not be loaded by the proxy." I'll try it again latter today or on Monday. Just wanted to let you know that I did not forget about you.

I got your name and e-mail from IEEE SE mag. I noticed all the Ed Board has e-mails and hope you have them in a distribution list. Can you send the message below to them and any one else that you would like to? I think it is an important effort and more of the software community should be involved. Would you classify this as a soft chain letter?
