Bruce
Excellent work on the Draft.

A couple of points:
1. A new engineer needs project management
skills. Is this included in Mgmt of the Software
process? For any Engineer, a course in PM is
rare but it is usually the first thing they are ass-
ociated with.
2. There is no mention of hardware and comm-
unication overviews. Since software is associated
with these areas, some background should be developed.

Ed Mechler, CCP
Member of SEEPP Task Force of the Committee
