Re: Copy of: URGENT : Joint ACM -IEEE Software Isuues

Jayaam,

It is a great idea; one that I wish I would have thought up.

I received this message yesterday and put some ideas
down then today added some more.

If it is a joint effort you should be first for it was your idea
and I am not a professor and position counts.

If it is global what about S. America? Africa? Just
brainstorming.

As for topics, we could use the SEEPP outline as
a start. Some ideas:
        Definition of Soft Engr (old-new)
        Area papers Education
                    Ethics
                    etc.

After and if accepted what about a book; tried to do this
with Dr. Cleland of the University of Pittsburgh on a
different subject but did not work.

I am at a conference but will be thinking about this and
do more work next week. But as you can see I am very
interested. Lets go with it.

Ed
